Linux tasks

Use the Linux terminal to complete the following tasks.

> *See Part 1 for tickets 1, 2, and 3*

Ticket 4: Create a new user

1. Create a new user with the `adduser` command and name the user after a favorite cartoon character.
2. Set a secure password and complete other information prompted for.
3. Display the newly created account using the command `cat /etc/passwd | grep {username}`.
4. Take a screenshot showing the ***new account***

Ticket 5: Manage files and folders

1. Create folders named ***Accounting*** and ***Payroll***
2. Display the ***new folders*** and take a screenshot.
3. Create a file named ***Best Practices*** inside the ***Accounting*** folder.
4. Display the contents of the ***Accounting*** folder.
5. Take a screenshot showing the contents of the ***Accounting*** folder.

Ticket 6: Apply system updates

1. Check for updates using the `sudo apt update` command.
2. Use the `sudo apt upgrade` command to install updates.
3. Use the `less /var/log/dpkg.log` command to display a list of recent updates.
4. Take screenshots that display some of the ***updates made today***.

> *Type `Ctrl-Z` to exit the log screen.*

Congratulations! You completed the tasks for the final project.

Be sure to submit your screenshots in the **AI Graded** or **Peer Graded** assessment.
